MASTER HANDOFF FOR CQ

NOVEMBER 4, 2026 · INVESTORS.OCAL.CA · FOR CQ (EASYPEAR), COPY HAS

DOMAIN, HOSTING, BUILD, REDIRECTS, SEARCH, ANALYTICS, RELEASE WORKFLOW, ACCEPTANCE

The site is finished HTML. Your job is to put it on investors.ocal.ca, wire the three things that need an account (the email form, analytics, Search Console), redirect the old investor pages, and run the release workflow from then on. Nothing in the copy is yours to change; wording changes go to Matthew and are made in content.py, then rebuilt. Where the HTML has to be adapted to your stack, keep the structure, the title tags, the meta descriptions, the JSON-LD and the URLs exactly as built.

1. DOMAIN AND DNS

ITEM	SETTING
Host name	investors.ocal.ca (ocal.ca is OCAL's; investors@ocal.ca already runs on it). Matthew confirms registrar access.
Record	CNAME investors to the host you deploy on (Cloudflare Pages, Netlify, or the current ocalfinancial.ca host). HTTPS mandatory; HTTP to HTTPS 301.
Apex	ocal.ca itself: leave as is. If it has no website, a 301 from https://ocal.ca/ to https://investors.ocal.ca/ is welcome but not required.
www	www.investors.ocal.ca is not used; do not create it.
Email	No change. The site links mailto:investors@ocal.ca; that mailbox forwards to Matthew and Shushu (Has confirms the rule).

2. HOSTING AND DEPLOYMENT

- **Recommended: static hosting.** Cloudflare Pages (free) or the existing Cloudflare account in front of a static bucket. Upload the site folder as-is: index.html at the root, one folder per page with its own index.html, assets, sitemap.xml, news-sitemap.xml, feed.xml, robots.txt, llms.txt, 404.html, site.webmanifest. Set 404.html as the not-found page so unknown URLs return a real 404 status (the current site returns 200 for unknown URLs, which search engines treat as a soft 404).

- **Alternative: port into the CMS.** If you prefer the investor pages inside your content system, create one page per URL with the same slug, paste the body of each page's main element, keep the title tag, meta description, canonical and JSON-LD from each file's head, and load assets/css/style.css unchanged. Do not let the consumer site's header, footer, lead-gen scripts or chat widgets onto investor pages (TMX guidance: keep investor and consumer content apart).
- **Trailing slashes.** Every URL ends with a slash (/stock/). Redirect the slashless form with a 301. No query strings for content.
- **Caching.** Cache HTML at the edge for anonymous visitors and purge on every publish. The investor home must weigh under about 1.5 MB on first load; today it is well under that.
- **Fonts and third parties.** Poppins loads from Google Fonts with preconnect; you may self-host it instead. The only other third parties are TradingView (two script embeds) and the email form's endpoint. No tag manager, no pixels, no chat widget on this domain.

2A. DESIGN: IT MATCHES OCALFINANCIAL.CA

The investor site uses the live consumer site's design tokens, read from ocalfinancial.ca on 23 October 2026: Poppins body at 16px in #263340 on #FAFAFA; Outfit for headings, navigation, buttons and labels; Playfair Display italic for the accent word in hero headlines; navy #001240 panels and headings; green #017333 pill buttons (999px radius, 12px by 22px padding, 14px, weight 600); lime and mint accents for kickers; a white sticky header at 68px with the navy logo and a green pill; the dark #101510 footer at 72 percent white; 12px to 24px radii; the navy step cards with a small-caps step label. If the consumer site's tokens change, change them once in assets/css/style.css (the :root block) and the whole investor site follows. Fonts load from Google Fonts; self-host them if the consumer site does.

3. THE PAGES: URL, TITLE TAG, META DESCRIPTION

These are built into each file. Keep them exactly; they carry the brand string 'TSXV: OCAL' that the SEO plan (document 05) depends on.

URL	TITLE TAG	META DESCRIPTION
/	OCAL Financial (TSXV: OCAL) Investor Relations	OCAL Financial (TSXV: OCAL): the technology-enabled automotive financing and purchasing platform. Approval first, zero standing inventory, audited growth.
/why-ocal/	Why Invest in OCAL Financial (TSXV: OCAL)	Why invest in OCAL: the problem, the platform, the solution and the thesis. Approval first, zero standing inventory, audited growth, operating leverage.

/how-it-works/	How OCAL Works | OCAL Financial (TSXV: OCAL)	How OCAL finances and sources a vehicle, approval first: apply, qualify, approve, match through OPENLANE, deliver. Who carries the risk, how OCAL earns.
/stock/	OCAL Stock: Price, Chart, Share Structure (TSXV: OCAL)	OCAL share price and chart (TSXV: OCAL, Frankfurt: JC3), shares outstanding, warrants, options, escrow schedule and transfer agent.
/financials/	OCAL Financial Reports and SEDAR+ Filings (TSXV: OCAL)	Audited statements, MD&A, interims and the Filing Statement with SEDAR+ links. FY2025 revenue $6.48M audited; FY2026 results due by 29 December.
/operating-metrics/	OCAL Operating Metrics (TSXV: OCAL)	Vehicles funded, average selling price, gross profit per vehicle and gross margin, published monthly under fixed definitions. Historical, unaudited.
/news/	OCAL Financial News Releases (TSXV: OCAL)	Every OCAL Financial news release since the TSXV listing on 21 July 2026, filed on SEDAR+ and distributed by Newsfile. Get releases by email.
/news/2026-11-03-repossession-rate-and-agm/	Repossession Rate Under One Percent; AGM 10 December | OCAL Financial (TSXV: OCAL)	OCAL Financial (TSXV: OCAL) reports a repossession rate under one percent since 2021, about 99 percent of contracts funded, and sets its 2026 AGM for 10 December.
/events/	OCAL Financial Events and AGM (TSXV: OCAL)	OCAL Financial's AGM on 10 December 2026, filing deadlines, monthly operating updates and conferences, with materials posted the same day.
/presentations/	OCAL Investor Presentation and Fact Sheet (TSXV: OCAL)	OCAL Financial's current investor presentation, elevator pitch, four-page brief, long-form briefing and investor Q&A, October 2026. Dated and versioned, with SEDAR+ links.
/fact-sheet/	OCAL Financial Fact Sheet, November 2026 (TSXV: OCAL)	One-page OCAL fact sheet: audited FY2025 revenue $6.48M, zero standing inventory, 1,500+ funded deals, the five steps and the roll-out. Printable.
/governance/	OCAL Financial Governance (TSXV: OCAL)	OCAL Financial's board of directors, audit and governance committees, policies, AGM materials, auditor, counsel and transfer agent.
/leadership/	OCAL Financial Leadership and Board (TSXV: OCAL)	The people running OCAL Financial: CEO Mehdi Moghareh, Executive Chairman Matthew Friesen, CFO Terence Lee, the team and the board.
/faq/	OCAL Financial Investor FAQ (TSXV: OCAL)	Thirty investor questions answered plainly: is OCAL a broker, where the cars come from, who takes the credit risk, going concern, escrow, insiders.
/contact/	Contact OCAL Investor Relations (TSXV: OCAL)	Contact OCAL investor relations: investors@ocal.ca, 1 (604) 687-7765, book a call with the founders, transfer agent details and email alerts.
/subscribe/	OCAL Financial Email Alerts (TSXV: OCAL)	Every OCAL Financial news release, operating update and filing by email within the hour of distribution. Double opt-in, unsubscribe any time.

/facts/	OCAL Financial Company Facts (TSXV: OCAL)	Reference facts for OCAL Financial Inc.: legal name, TSXV and Frankfurt symbols, ISIN, CUSIP, LEI, head office, officers, auditor, transfer agent.
/legal/	Legal Notices | OCAL Financial Investor Site	Forward-looking information, non-IFRS measures, no offer of securities, third-party data, privacy and terms for the OCAL Financial investor site.

4. WIDGETS AND ACCOUNTS

WIDGET	WHERE	WHAT YOU DO
TradingView mini overview	Home, below the hero	Already embedded (symbol TSXV:OCAL, 3-month range). No account needed. The fallback text under it links to TMX Money and Frankfurt; keep it, because a dead quote box is worse than none.
TradingView advanced chart	Stock page	Already embedded, daily candles, 6-month default, symbol locked. Fixed height of 520 px to prevent layout shift.
Email alert form	Home, Stock, Financials, Operating metrics, Events, Contact, Subscribe	Has creates the Brevo list with double opt-in and gives you the form action URL; paste it into SITE['form_action'] in content.py and rebuild (one string, seven blocks). Field name EMAIL. Until then the button opens an email to investors@ocal.ca with the visitor's address, so the block already works.
Investor call booking	Home, Why OCAL, Leadership, Contact	The buttons open an email to investors@ocal.ca with the subject 'Book a 30-minute investor call'. If Matthew later supplies a calendar link, it is one string (SITE['booking_link']) and a rebuild.
Hero photograph	Home page	assets/img/hero.jpg is a placeholder frame from an internal slide, heavily overlaid. Replace it with the consumer site's night-time car photograph or another OCAL-owned photograph with no text in it, 1920 px wide, under 250 KB, and keep the overlay; the headline must stay readable at every width.
Analytics	Every page	GA4 property for investors.ocal.ca (Has owns it). Add the gtag snippet to the head in the build template or via Cloudflare Zaraz. Events to configure: subscribe_submit, fact_sheet_print, deck_download, release_read (per-release page view), call_booked (outbound click to the booking link), quote_widget_click (TradingView iframe interaction is not trackable; track the TMX Money link instead).

Search Console and Bing	Domain level	Verify investors.ocal.ca by DNS TXT in Google Search Console and Bing Webmaster Tools; submit sitemap.xml and news-sitemap.xml to both; add IndexNow (key file at the root, one POST per publish). Screenshots of both verifications to Matthew.

5. REDIRECTS FROM OCALFINANCIAL.CA

Every investor URL on the consumer site redirects one to one with a 301 the moment the new domain is live. Keep them for at least a year. The old release pages move to the new per-release pattern; until each release has its own page on the new site, redirect it to /news/.

FROM (OCALFINANCIAL.CA)	TO (INVESTORS.OCAL.CA)
/investor-relations	/
/investor-relations/ and /investors and /investors/	/
/investor-relations/press-release/<slug> (19 pages)	/news/<YYYY-MM-DD-slug>/ once built; /news/ meanwhile
/investor-relations/press-release/press-release-ceo and press-release-director (the 18 March 2026 letters)	/presentations/ (the letters are withdrawn; they still call OCAL a brokerage)
Corporate presentation and fact sheet PDFs linked from the old page	/presentations/ (the August fact sheet and any deck showing $6.88M are withdrawn; see document 03)
/llms.txt on ocalfinancial.ca	Rewrite it (document 03, section 4) so it no longer says 'auto finance broker' or 'One Click Auto Loan'. The new site has its own llms.txt.

On the consumer site: the Investors item in the main navigation and the footer link point to https://investors.ocal.ca/ with the anchor text 'Investors (TSXV: OCAL)'. Add the same link to the consumer footer's legal line. Remove the old investor page from the consumer sitemap after the redirect is live.

6. RELEASE-PAGE WORKFLOW (EVERY NEWS RELEASE, FROM THE FIRST ONE AFTER GO-LIVE)

1. **Wait for the wire.** The release page goes live only after Newsfile has distributed it (TSXV Policy 3.3, CIRO). Shushu or Matthew sends you the final text and the Newsfile URL.
2. **Create the page.** Add the release to content.py NEWS (date, headline, path, category) and add a page entry using the 3 November 2026 page (/news/2026-11-03-repossession-rate-

and-agm/) as the pattern: kicker with date and dateline, headline as H1, sub-headline, body paragraphs as issued, quotes, operating performance section, About OCAL, investor contact, cautionary notes, s8.6 statement. The description is the release's first sentence, 140 to 155 characters, never the dateline.

3. **Rebuild and publish.** Run build_site.py; the news list, RSS feed, sitemap and news sitemap update themselves. Deploy. The new URL is permanent.
4. **Tell the engines.** IndexNow POST for the new URL; Search Console URL inspection and Request indexing for the new URL and the news index.
5. **Tell the list.** Has sends the release to the email list within the hour, linking to the new page and to SEDAR+.
6. **Operating metrics.** If the release is a monthly results release, its figures go into the Operating metrics history (content.py, same rebuild), exactly as released.

7. SCHEDULE

DAY	MILESTONE
Day 1	Package received. DNS record requested from Matthew. Staging URL created from the site folder as delivered.
Day 2	Staging URL to Matthew and Shushu. Email form wired if Has has the list ready; otherwise the email-request fallback stays.
Day 3	Matthew's and Shushu's edits applied (via content.py), rebuild, placeholder count zero (it is zero today).
Go-live	DNS, HTTPS, redirects, consumer-site links, sitemaps submitted, IndexNow key in place. Acceptance checklist signed off. The 10 November 2026 results release is the first under the new workflow if the site is live by then.
Within 7 days	Core Web Vitals check (PageSpeed Insights, mobile and desktop), Search Console coverage report clean, GA4 events firing, first weekly search-rank snapshot (document 05, section 2).

8. ACCEPTANCE CHECKLIST (CQ SIGNS EACH LINE, MATTHEW APPROVES)

- All 18 URLs return 200 with the built title, description, canonical and JSON-LD; an unknown URL returns 404 with the 404 page.
- Every link on every page resolves; no # anywhere.
- TradingView widgets load and show TSXV:OCAL; fallback text visible beneath.
- Email form submits to the live list; a test subscription receives the double opt-in and the welcome email with the fact sheet attached or linked.
- Booking links open the calendar; mailto links open with the right address and subject.

- All ocalfinancial.ca investor URLs redirect with 301 to the mapped targets; the consumer Investors link points to the new domain.
- sitemap.xml, news-sitemap.xml, feed.xml and robots.txt are reachable and submitted; IndexNow key file present.
- Rich results test passes on the home (Corporation, WebSite, BreadcrumbList), FAQ (FAQPage) and the sample release (NewsArticle).
- Mobile: no horizontal scroll at 375 px; menu opens and closes; tables scroll inside their frame; KPI tiles stack.
- Print: /fact-sheet/ prints to one page from the browser with header, footer and buttons hidden.
- Lighthouse or PageSpeed: performance 90+, accessibility 95+, SEO 100 on the home and the stock page (mobile).
- No consumer scripts, chat widgets or lead-gen pixels on the investor domain.
- Placeholder count zero (python build_site.py prints it) and no yellow highlights anywhere.

9. THE TWO GO-LIVE STRINGS (THERE ARE NO PLACEHOLDERS)

The build prints 'placeholders: 0'. Two values are swapped in content.py when the team has them, then rebuild: SITE['form_action'] (the Brevo form action URL from Has; empty today, which renders the email-request fallback) and, optionally, SITE['sedar_profile'] and the FILINGS links (today they open the SEDAR+ search page, where the issuer profile is found by searching 'OCAL Financial Inc.'; SEDAR+ refuses automated access, so a person captures the profile URL from a browser and pastes it).

QUESTIONS ON THIS PACKAGE

Matthew Friesen, Executive Chairman and Director

matthew@ocal.ca · 604-240-7818 · OCAL Financial Inc., Vancouver

Shushu Feng, Signal Capital Advisors, reviews investor-facing wording

Internal working document for OCAL's web and investor relations team. Not for publication. Every figure on the site traces to a filing or a release. There are no placeholders; the two go-live strings are in document 01, section 9.
