OPERATING UPDATE: SITE COMPANION

NOVEMBER 4, 2026 · HOW THE MONTHLY BLOCK APPEARS ON INVESTORS.OCAL.CA

THE MASTER TEMPLATE LIVES WITH THE RELEASE PROGRAM; THIS IS THE SITE SIDE OF IT

The news release structure, the ten-release calendar and the operating update block were rebuilt on 23 October 2026 in the release program (OCAL\Press Releases\02 Scheduled, notes file 00; generator build_release_program_oct2026.py). This document does not repeat them. It shows how the block lands on the investor site, how a release becomes a page, and who does what each month so the release, the site and the email carry the same numbers on the same day.

1. WHERE THE BLOCK APPEARS ON THE SITE

PLACE	WHAT IS SHOWN	UPDATED
Home page, 'The audited results' section	The audited FY2025 and FY2024 table today; from the first monthly results release, a line linking to the latest month on the Operating metrics page	Same day as the release
Operating metrics page, 'Monthly history'	The latest month's table: vehicles funded and delivered, average vehicle selling price, gross profit per vehicle on both bases with the reconciling items, gross margin; prior month beside each	Same day
Operating metrics page, history table	One row per month, plus the fiscal 2025 audited row, added as each release is issued	Same day
Operating metrics page, 'Definitions, fixed'	The definitions exactly as settled with Terence and Lawson; the non-IFRS note	Only if a definition changes, which it should not
Release page (/news/YYYY-MM-DD-slug/)	The release as distributed, including its operating update section and the definitions sentence	When the wire has carried it
Email to the list	Headline, first two paragraphs, the table, links to the release page and SEDAR+	Within the hour of the wire

2. THE BLOCK AS IT WILL READ ON THE SITE, FROM THE 10 NOVEMBER 2026 RELEASE

METRIC	OCTOBER 2026	SEPTEMBER 2026
Vehicles funded and delivered	[X]	[X]
Average vehicle selling price	$[X]	$[X]
Deal gross profit per vehicle (management basis), of which vehicle margin and finance, insurance and protection income	$[X] ($[X] + $[X])	$[X] ($[X] + $[X])
Gross profit per vehicle (IFRS basis)	$[X]	$[X]
Gross margin	[X]%	[X]%

Approximate monthly figures; unaudited management information; definitions on the Operating metrics page; confirmed by the CFO from the ledger before release. Vehicles funded and delivered is a supplementary financial measure, and average vehicle selling price, gross profit per vehicle and gross margin per vehicle are non-GAAP financial measures or ratios; none is a measure defined under IFRS. OCAL calculates them as described on the Operating metrics page, applies the same definitions every period, reports them unaudited, and reconciles the per-vehicle figures to the revenue and gross profit lines of its financial statements in the release that carries them. They should be read with the financial statements and MD&A filed on SEDAR+.

3. HOW A RELEASE BECOMES A PAGE

1. **Wait for the wire.** Nothing is posted before Newsfile has distributed it.
2. **Add the release to content.py.** One line in NEWS (date, headline, path, category) and one page entry on the pattern of the 3 November 2026 page; the description is the first sentence after the dateline.
3. **Add the month to the metrics.** The released figures go into the history table on the Operating metrics page (content.py, same change), exactly as released.
4. **Rebuild and deploy.** build_site.py updates the news list, RSS, sitemap and news sitemap; CQ deploys and pings IndexNow and Search Console.
5. **Email and LinkedIn.** Has sends the list email within the hour; the corporate LinkedIn post carries the headline and the link.

4. WHO DOES WHAT, EACH MONTH

STEP	OWNER	WHEN
Pull and confirm the month's figures from the ledger	Terence	First two business days after month end

Draft the operating update release from the program's content module	Matthew (Shushu's version merged)	Day 2 to 3
Legal review and CIRO pre-file	Garrett	Before distribution
Newsfile distribution, before 8:30 am ET	Shushu	Release day
Release page, home block, history table, sitemap, IndexNow	CQ	Release day, after the wire
Email to the list, LinkedIn post, fifteen-minute pickup check	Has	Release day
