WHAT WE TOOK FROM 33 INVESTOR SITES

NOVEMBER 4, 2026 · RESEARCH SYNTHESIS · FOUR FILES IN THE RESEARCH FOLDER

THIRTY-THREE SITES, ONE AFTERNOON, AND WHERE EACH IDEA LANDED

Four reviews ran in parallel on 23 October 2026: Canadian fintech, auto and TSXV investor sites (file A, ten sites); US auto retail, auto finance and marketplace peers (file B, ten sites); best-in-class and award-winning IR sites plus the SEO plan (file C, thirteen sites); and OCAL's own public record (file D). Every site was visited the same day; the files record what each does, what to copy and what to avoid, with URLs. This document is the synthesis: the ideas we took, who we took them from, and where they are on the new site.

1. THE SITES

GROUP	SITES
A. Canadian fintech, auto, TSXV	goeasy, Propel Holdings, Chesswood (in wind-down), Mogo (now Orion Digital), AutoCanada, Kraken Robotics, VitalHub, WELL Health, E Automotive and Canada Drives and Clutch (how an online auto company describes itself), Quantum Critical Metals (the TSXV microcap pick, about $7M market value)
B. US auto retail, finance, marketplaces	Carvana, CarMax, Credit Acceptance, America's Car-Mart, Upstart, Open Lending, ACV Auctions, OPENLANE, CarGurus, Cars.com
C. Best in class and award winners	Shopify, Lightspeed, Constellation Software, Lemonade, Affirm, SoFi, Docebo, Calian (Best IR website, Canada 2025), Happen Bank (Best overall IR, small cap, US 2025), Lulu's (Notified showcase), Red Robin (Equisolve showcase), Shift and Vroom (what not to do)
D. OCAL's public record	ocalfinancial.ca investor pages, TMX Money, SEDAR+ mirrors, 22 Newsfile distributions, Frankfurt, 14 data-vendor profiles, 16 search queries, media and bullboards

2. THE IDEAS WE TOOK, AND WHERE THEY ARE

IDEA	TAKEN FROM	ON THE NEW SITE
Numbers with a definition and an as-of date under each, never a bare figure	Propel, Calian, Affirm, Shopify, CarGurus	KPI tiles on Home, Why OCAL, Financials; every table carries a source note and date

Per-vehicle economics table with the denominator stated in a footnote, prior-year column, one sentence on what moved	CarMax (gross profit per unit with % of sales), Carvana (GPU parts add to the total), America's Car-Mart (candour when units fall)	Operating metrics page, home-page block, release template; definitions fixed once
A dedicated, always-current operating-metrics page with history (none of the ten US peers has one)	Gap in the peer group; Upstart's monthly page with definitions and 'preliminary' flag	/operating-metrics/ with history table and chart frame
Why Invest page with argument blocks and the forward-looking caution the peers omit	Cars.com (structure), Propel (dated proof), Clutch (four-tile proof strip)	/why-ocal/: nine numbered sections, market table with legend and assumptions
Capitalization table with as-of date: shares, warrants by strike and expiry, options, fully diluted, escrow, insider ownership (no US peer has a standalone one)	Quantum Critical Metals, Atlas Salt, WELL's share-structure layout	/stock/ capitalization and escrow tables
Live quote and chart from a free widget, with a text fallback so a dead widget never shows	Plurilock and Quantum (TradingView), SoFi (sticky quote bar), Shift (the dead '--' warning)	Home mini chart, Stock page advanced chart, fallback links to TMX and Frankfurt
One row per period with every document, and a SEDAR+ link on the financials page	VitalHub, goeasy, Carvana, Calian	/financials/ documents table and reporting calendar
Investor FAQ written from real questions, with FAQPage schema, the hard questions first	WELL, Credit Acceptance (questions answered in writing), Open Lending and Cars.com (plumbing questions)	/faq/: three hard answers first, then business, shares, plan
Ticker in every title tag; unique meta descriptions; Corporation JSON-LD with tickerSymbol and sameAs	Kraken, WELL, Quantum, Happen Bank, ACV; most sites reviewed have none	Every page; schema graph in the build
Double opt-in alerts in several places, named IR contact with direct email and phone, no form	AutoCanada, Propel, goeasy, CarMax	Subscribe blocks on seven pages; Contact page
Governance on one page: committee matrix, documents list, insider ownership, whistleblower line	AutoCanada, ACV, Lemonade, Docebo	/governance/
Events with dates, materials and the next reporting deadline; AGM materials shelf	AutoCanada, Propel, Cars.com	/events/ with Event schema
A facts page and a standard description for vendors and AI engines	Happen Bank's entity work; the vendor audit in file D	/facts/ and llms.txt; the description pack in documents 02 and 03
Dated, versioned documents; superseded versions withdrawn	Kraken (dated deck), Carvana (dated introduction deck)	/presentations/
A printable one-page fact sheet	Clutch's proof strip, the OCAL one-pager	/fact-sheet/ with print styles
Founder voice in the copy	Lemonade's founders' letter, Constellation's president's letters	Quotes and lines from Mehdi and Matthew across the site; a letter page is the next addition

3. WHAT WE DELIBERATELY DID NOT COPY

- **Analyst tables and hosted research.** OCAL has no coverage; an empty or padded list hurts. The site says so plainly and promises to list every analyst when one appears.
- **Enterprise IR platforms, iframes and two-domain stacks.** They cost real money, split authority and leak other clients' text (seen on AutoCanada and E INC). One domain, static HTML, free widgets.
- **Mega-menus and modules that arrive empty.** Carvana, CarMax and WELL run 16 to 35 destinations, several blank without JavaScript. OCAL has nine menu items and no page without content.
- **Non-GAAP stacks, guidance ranges and long-term targets.** Carvana's and OPENLANE's reconciliations and outlooks suit large caps with analysts. OCAL publishes GAAP-based per-vehicle numbers, historical only, and keeps plans on one page under the legend.
- **Superlatives and comparative claims.** 'No. 1', 'largest', 'industry-leading' rest on third-party rankings. Every comparative on the new site is sourced or absent.
- **Named competitors.** The peer sites and the first draft of this site used named online retailers and dealer groups as the cautionary tale. Matthew's rule of 23 October: no competitor is named or described on the investor site. The argument now rests on industry statistics with a source and on OCAL's own record.
- **Gated decks, contact-form-only IR, consumer promotions on investor pages, and stale 'as of' dates.** The deck is a plain PDF, the IR contact is a named email, the consumer site is a link, and every number carries a date and an owner.

4. WHAT THE AUDIT OF OCAL'S OWN RECORD CHANGED

- **Figures.** Escrow 23,638,104; warrants 11,029,501 plus 39,760 finder warrants; options 600,000 plus 100,000 pending; fully diluted about 48.3 million; the July financing as 6,029,500 units for $1,507,375.
- **Contradictions removed.** The old page said 'no inventory' and 'revenue from financing commissions'; the interim statements show $86,300 of inventory, a $222,033 floorplan balance and vehicle sales at 89 percent of revenue. The new site explains both in one paragraph each.
- **Wording.** 'Brokerage' still lives in two March 2026 letters, the consumer site's llms.txt and the Newsfile profile; all are listed for correction. The acquisition of the lead supplier has no news release, so the site does not state it.
- **Search.** OCAL's own pages were absent from the top nine for every brand query; the SEO plan (document 05) starts from that fact.

5. WHERE TO READ MORE

FILE	WHAT IS IN IT
research \ A - Canadian fintech, auto and TSXV investor sites.md	Ten site profiles, cross-site grid, top 12 ideas, five not to copy, recommended navigation and SEO pattern
research \ B - US auto retail, auto finance and marketplace investor sites.md	Ten site profiles, per-unit metric definitions from Carvana, CarMax and Car-Mart with latest values, the draft OCAL per-unit table, top 12, five not to copy, stale content seen on live peer sites
research \ C - Best-in-class IR sites and the SEO plan.md	Thirteen site profiles, ten design ideas, the full SEO plan: queries and who ranks, structured data with copy-ready JSON-LD, technical patterns, indexing methods with evidence, AI engines, the vendor table with contact routes, newswire distribution and the release-day checklist
research \ D - OCAL public record audit.md	The live investor page verbatim, every claim on it, TMX Money data, SEDAR+ figures, all 22 releases with URLs and which carry numbers, board and officers as publicly stated, share structure, named parties, 14 vendor profiles quoted and flagged, 16 search queries with top results, media coverage, a 24-item conflicts register
